

Immune

DAILY HEALTH

Give your immune system the support it needs*

*Immune helps your immune system perform at its peak, so you stay healthy and active all year long.**

IMMUNITY FACTS*

Free radicals are unstable, volatile molecules that can damage cells and DNA in your body, impacting your good health.

Antioxidants neutralize these free radicals, restoring your body's good health. They are found mostly in fruits, veggies and leafy greens.

Our daily diets are low in both quantity and diversity of antioxidants – making quality supplementation a must.

*Super-boost Your Immune System**

- Immune is a powerful blend of top-grade therapeutic mushrooms, saturating your system with free radical-fighting antioxidants – at 10x the level of the next-closest competitor.*
- Immune helps your body naturally increase its production*
- of glutathione, your master antioxidant, helping you stay healthier year-round.*
- Restoring your weight and health can temporarily crush your immune system. Immune makes it easier by boosting both your immune function and performance capability.*
